Short Description

Oregon Scientific OS-BAR388HG Wireless Weather Station with Temperature/Humidity Display

Description

The barometer and weather forecast keep you in touch with the changing weather conditions while the radio-controlled clock provides the precise time.

Special functions like ice warning, high/low temperature and humidity alarms, moon phase and pressure trends help you to stay on top of the weather.

The Wireless Weather Station includes all the features you need to become a weather expert. With a 12 to 24 hour forecast, barometric pressure trends with three levels of pressure and temperature indicators: rising, steady and falling, and indoor / outdoor temperature and humidity display, and a modern design, this weather station gives you a comprehensive view of your environment.

The indoor / outdoor temperature and humidity display with trend icons will help you choose the most comfortable and suitable outfits.
