

# Oregon Scientific Dual Alarm Clock with Radio-Controlled Time - RM938-WH

## Product Images

## Short Description

A great value alarm clock with a simple and handy design, this radio-controlled (atomic) clock is both easy to read and operate.

## Description

---

### A great value alarm clock

You will never have to set the time again - the time is radio-controlled, so is always precise to the second and adjusts automatically to and from British Summertime.

The clock can also be adjusted to automatically pick up the either the European and US radio-controlled signal, making it perfect for international travel.

A dual alarm function allows you to set two alarm times on a single clock - one for you and one for your partner, and with an 8-minute snooze function and snooze touch technology, you decide whether it's time to get up or perhaps have a little snooze!

## Additional Information
