Additional Information

Brand	FCC
Explanation	<p>Wall mounted Barometer. Solid ash mount. White dial and chrome bezel & pointer. Has open dial revealing attractive chrome mechanism.</p> <p>Matching wall mounted Clock and Time & Tide Clock available</p> <p>Barometers make useful gifts for anyone involved in outdoor activities or involved with animal care: farmers, equestrian, golfers, gardeners, walkers</p> <p>Barometers read the pressure of the immediate location where placed. It will advise you of what weather to expect in the next 12 - 24 hours</p> <p>How to ready your barometer: The chrome pointer in the glass should be turned so that it rests directly above the black barometer pointer. The chrome pointer acts as a marker enabling you to remember today's pressure when you next look at your barometer. You can thus see whether the pressure is rising or falling and how significant a rise or fall in pressure has occurred. A rapid increase in pressure indicates a short period of good weather and a fast decrease indicates storms and strong winds approaching. A slow, constant increase in pressure indicates a period of settled, dry, sunny weather, whereas a steady decrease indicates persistent bad weather.</p> <p>If the pressure falls considerably below 1000 millibars, you can expect storms and strong winds.</p>
