A very attractive traditional weather station consisting of Barometer, Thermometer & Hygrometer for a modern styled home.

The Banjo Barometer is eco-friendly and needs no battery.

Length: 580mm

# Additional Information

Brand	FCC
Explanation	<p>Barometers make useful gifts for anyone involved in outdoor activities or involved with animal care: farmers, equestrian, golfers, gardeners, walkers. Barometers read the air pressure of the immediate location where placed. It will advise you of what weather to expect in the next 12 – 24 hours</p> <p>How to ready your barometer: The chrome pointer in the glass should be turned so that it rests directly above the black barometer pointer. The chrome pointer acts as a marker enabling you to remember today's pressure when you next look at your barometer. You can thus see whether the pressure is rising or falling and how significant a rise or fall in pressure has occurred. A rapid increase in pressure indicates a short period of good weather and a fast decrease indicates storms and strong winds approaching. A slow, constant increase in pressure indicates a period of settled, dry, sunny weather, whereas a steady decrease indicates persistent bad weather. If the pressure falls considerably below 1000 millibars, you can expect storms and strong winds.</p> <p><b>Thermometers and Hygrometers</b></p> <p>These instruments on the Banjo Barometer measure the climate in your home. Thermometers measure the temperature and Hygrometers measure the humidity in the air. A comfortable room has a temperature range of 18-22C with a humidity reading of between 45 and 70%</p>
Ideal For	Interested, Gardeners, Decorative
Indoor Unit	<p>Traditional 'banjo' style weather station with a wooden case in ash.</p> <p>The instrument faces are coloured steel with steel coloured bezels.</p> <p>Readings are in inches of mercury, hPa/mbar, °C and °F.</p>
