

S-WSB-M003 Wind Speed Smart Sensor

Product Images

Short Description

Measure wind speed from 0 to 76 m/s (0 to 170 mph) with the S0WSB-M003 smart sensor. The data provided by it reports average wind speed and highest 3 second gust for each logging interval. The starting threshold is 1 m/s (2.2 mph); sensor survives through 170 mph. This unit comes with a 3m cable.

Description

S-WSB-M003 Wind Speed Smart Sensor including 3m cable

Measure wind speed from 0 to 76 m/s (0 to 170 mph) with the S0WSB-M003 smart sensor. The data provided by it reports average wind speed and highest 3 second gust for each logging interval. The starting threshold is 1 m/s (2.2 mph); sensor survives through 170 mph. This unit comes with a 3m cable.

NOTE: You will require a M-CAA Full Cross Arm or a M-CAB Half Cross Arm for mounting.

Environment:

The S-WSB-M003 Sensor is suitable for both Indoor and Outdoor environments

Measurements:
Wind Speed

Additional Information

Brand	Onset HOBO
Measurements	Wind Speed
Compatible With	U30, H21, H22
