Product Images

Short Description

Install your Vantage Vue or wireless Vantage Pro2 console or Weather Envoy outside with solar power and shelter. (For cabled Vantage Pro2 console use the Heavy Duty Solar Power Kit and the Universal Shelter.)

Description

Install your Vantage Vue or wireless Vantage Pro2 console or Weather Envoy outside with solar power and shelter. (For cabled Vantage Pro2 console use the Heavy Duty Solar Power Kit and the Universal Shelter.)

Mount your console outside

Mount your wireless console or Weather Envoy outside. The large solar panel powers a wireless console or Weather Envoy inside a weather resistant shelter. (Outdoor sensors are powered by the solar panel on the sensor suite.)

Perfect for cold environments

- Operates down to -40F (-40C)
- Battery will continue to charge down to -4F (-20C)

Powerful battery keeps running even when light is low

Estimated battery run time (in darkness)

Powering:

- Wireless Vantage Pro2 console: 58 days
- Cabled Vantage Pro2 console: 10 days
- Vantage Vue console: 60 days
- Envoy8X with 1 ID: 60 days
- Envoy8X with 4 IDs: 48 days
- Envoy8X with 8 IDs: 23 days
