

Mobile Alerts MA10230 Indoor Climate Station - Optional Smartphone App Connectivity

Product Images

Short Description

The indoor climate station reduces the levels of mould throughout households and businesses by promoting

proper ventilation.

Description

This indoor climate station helps reduce the likelihood of mould in your house or business by promoting correct ventilation. Ventilation is essential to reduce the levels of condensation and also to protect respiratory health.

When used with the Mobile Alerts gateway ([MA10000](#)), you can receive ventilation alerts on iOS and Android devices.

Additional Information

Brand	Technoline
Explanation	<p>The MA10230 indoor climate station detects when it is time to open the window for ventilation or when to close again and alerts you automatically and directly to your smartphone (when connected to a MA10000 Mobile Alerts Internet Gateway). This way, you not only effectively prevent the risk of mould, but also save yourself regularly unnecessary heating and energy costs through appropriate and efficient ventilation.</p> <p>Using multiple MA10230 stations and the MA10000 create a home monitoring network to measure and record temperature and humidity.</p> <p>In addition, if you pair the MA 10230 with an external sensor MA10200 Temperature & Humidity Senosr in the smartphone app, you will see ventilation recommendations.</p>
Ideal For	Amateur, Interested
Batteries	2 x AAA (not included)
Power	Battery only
Compatibility	This sensor is compatible with the Mobile Alerts remote monitoring system.
Sensors	<p>Measuring range temperature: – 9.9°C to + 59.9°C Accuracy: +/- 0,8°C Measuring range humidity: 1% to 99% Accuracy: +/- 3% Transmission frequency: 868 MHz Transmission range: 100m (open area)</p>

Additional Options

Batteries	2 x AAA Alkaline 1.5V Batteries
