Mobile-Alerts MA10050 Internet-Enabled Weather Station Starter Pack

Product Images

Short Description

The weather station consists of a gateway with corresponding measuring units (transmitters) that measure weather data such as temperature, humidity, wind speed, wind direction, and rainfall.

27/04/2024

Description

View your weather from the Mobile-Alerts app on your smartphone or tablet, wherever you are in world!
This starter pack contains sensors that measure temperature, humidity, wind speed, wind direction, and rainfall, Internet Gateway device and free smartphone app.

Internet Gateway
The gateway is the main unit; it collects all data from the sensors, which can be accessed via the Internet from your smartphone or tablet (iOS or Android) with the Mobile-Alerts app. The gateway simply plugs into your home's Internet router.

Mobile-Alerts App

- See an overview of all sensors' readings
- Alarm notifications: select your minimum/maximum acceptable values, and you'll receive alerts if they are exceeded, for example: too hot/too cold, too dry/too wet
- 90-day history of readings.

Expand Your System
Add additional sensors from the options below, to remotely monitor temperature/humidity in other areas of your home, whether a door/window has been opened, a fire alarm has been activated, or the temperature of your pool/pond.

Additional Information

Brand	Technoline
Contents	1 x MA10000 Gateway 1 x AC 20V-Adapter 1 x LAN-Cable 1 x MA10100 Temperature Humidity Sensor with 2 x AA-batteries 1 x MA10660 Rain gauge with 2 x AA-batteries 1 x MA10650 Wind sensor with solar cell (2 x AAA-batteries built in rechargeable alkaline cells) Mounting material Instruction manual
Ideal For	Amateur, Interested, Gardeners
Power	Mains (Gateway), Batteries (Sensor)
Compatibility	Apple compatibility: Requires iOS 7.0 or later. Compatible with iPhone, iPad, and iPod touch. Android compatibility: Version 3.0 or later
Sensors	1 x MA10100 Temperature and humidity sensor 1 x MA10650 Rain gauge 1 x MA10660 Wind sensor with solar cell The Internet Gateway can support up to 50 additional sensors. Optional sensors include humidity, rain, wind, water, contact, air quality and sound.
Dimensions	MA10000 Gateway: 103x27x40 mm (L x W x D)MA10100 Temperature and humidity sensor: 87x14x33 mm (L x W x D)
Installation	An internet connection is needed within range of the temperature sensor (approx 100 metres open space) with the gateway plugging directly into your internet router using the ethernet cable provided.Setup is very straightforward and the gateway automatically detects any other Mobile-Alerts sensors that are within range.

Additional Options

Add additional sensors	Mobile alerts contactless sensors for doors & windows
	Mobile alerts temperature & humidity sensor
	Mobile alerts signal sensor for fire alarms
	Mobile alerts Temp/Hum & Pool Sensor
