Short Description

This Weather Station monitors the temperature and humidity in up to four locations around your house - new colour screen version.

Description

Four-zone Weather Data on One Display. Keep your family comfy indoors and out with this sleek device that monitors temperature and humidity in up to four locations around your house: the living room, the baby's room, the garden - put a remote sensor anywhere!

With easy-to-read weather icons on a large LCD display to indicate the forecasted weather up to a day in advance, including mould alerts, you can always get prepared for the weather.

- Multi-zone weather station with large LCD display to view all readings from sensors in four different locations at a glance
- Weather forecast up to a day in advance within a 30-50 km (19-31 mile) radius
- Forecast using five easy-to-read icons – Sunny, Partly, Cloudy, Rainy & Snowy
- Mould alert
- Button-free design updates weather data automatically
- Customisable tabs for the main display allow you to identify readings by sensor location, e.g. Living Room, Bedroom, Greenhouse
- Up to 30 metres wireless transmission range
- Includes three splash-proof thermo-hygro sensors for indoor and outdoor use, two of which feature LCD display
- Main unit powered by AC/DC adapter (batteries for back up included).
