

Mobile-Alerts MA10901 Complete Internet-Enabled Weather Station

Product Images

Short Description

Please see [new page for this product](#)

Weather Station with with temperature, humidity, rain and wind sensors. View your weather on the colour display or the free smartphone app.

Description

Weather station with temperature, humidity, rain and wind sensors. View your weather on the colour display or the free smartphone app - wherever you are in world!

Display Unit

- Radio-controlled clock with manual setting
- Indoor and outdoor temperature and humidity
- Forecast of weather and weather tendency
- MIN/MAX recording
- Alarm & date
- Backlight with three different colour settings
- Table standing.

Internet Gateway

The gateway is the main unit; it collects all data from the sensors, which can be accessed via the Internet from your smartphone or tablet (iOS or Android) with the Mobile-Alerts app. The gateway simply plugs into your home's Internet router.

Mobile-Alerts App

- See an overview of all sensors' readings
- Alarm notifications: select your minimum/maximum acceptable values, and you'll receive alerts if they are exceeded, for example: too hot/too cold, too dry/too wet
- 90-day history of readings.

Expand Your System

Add additional sensors to remotely monitor temperature/humidity in other areas of your home, whether a door/window has been opened, a fire alarm has been activated, or the temperature of your pool/pond.
