## Product Images

## Short Description

[Please see new page for this product](#)

Weather Station with with temperature, humidity, rain and wind sensors. View your weather on the colour display or the free smartphone app.

## Description

---

**Weather station with temperature, humidity, rain and wind sensors. View your weather on the colour display or the free smartphone app - wherever you are in world!**

### Display Unit

- Radio-controlled clock with manual setting
- Indoor and outdoor temperature and humidity
- Forecast of weather and weather tendency
- MIN/MAX recording
- Alarm & date
- Backlight with three different colour settings
- Table standing.

### Internet Gateway

The gateway is the main unit; it collects all data from the sensors, which can be accessed via the Internet from your smartphone or tablet (iOS or Android) with the Mobile-Alerts app. The gateway simply plugs into your home's Internet router.

### Mobile-Alerts App

- See an overview of all sensors' readings
- Alarm notifications: select your minimum/maximum acceptable values, and you'll receive alerts if they are exceeded, for example: too hot/too cold, too dry/too wet
- 90-day history of readings.

### Expand Your System

Add additional sensors to remotely monitor temperature/humidity in other areas of your home, whether a door/window has been opened, a fire alarm has been activated, or the temperature of your pool/pond.
