

Kestrel Wind Vane Mount and Carry Case for 5000 Series

Product Images

Short Description

Turn your Kestrel 5 Series meter into a complete wireless weather station. Buy with confidence from Weather Shop - the UK's largest weather instrument specialist.

Description

Turn your Kestrel 5 Series meter into a complete weather station with the Rotating Vane Mount.

This precision engineered accessory securely mounts any Kestrel 5 Series meter to any tripod or other 1/4-20 fitted bracket. Once mounted, your Kestrel 5 Series becomes a full-featured weather station with a large wind vane and precision pivot that keeps the Kestrel oriented into the wind for continuous measurement and

logging of wind speed, wind direction, and other key weather parameters.

You can also use the mounting clip as a fixed ¼-20 compatible bracket, allowing use of an extension pole for taking wind or air flow readings.

Your Kestrel 5 series meter can also be conveniently stored and carried inside the Vane Mount pouch, making it the world’s most portable weather station. An internal battery loop secures spare AA batteries for your Kestrel meter, and a snap-strap on the rear secures the kit to your belt or pack.

For maximum functionality, choose a Kestrel with LiNK wireless data communication to accompany your Vane Mount. The Kestrel LiNK smartphone app displays the Kestrel's real-time readings on a vivid, customisable dashboard.

Additional Information

Brand	Kestrel
Ideal For	Professional, Education, Amateur, Interested, Agronomy
Specification	6.5 x 7.5 x 22 cm, 295 grams
