

Davis Metric AeroCone Rain Collector with Pro2 Pole Mount Base 6466M

Product Images

Short Description

Accurate stand alone rain gauge for Vantage Connect, Weather Envoy, and Vantage Pro2 stations and Integrated Sensor Suites.

Description

Stand-alone rain collector with a Vantage Pro2 mounting base.

Replaces the rain collector on your Vantage Pro2 sensor suite so it can be installed separately, or in an EnviroMonitor system. Uses the latest tipping spoon technology, which has superseded the tipping bucket mechanism.

Designed for Accuracy

The AeroCone rain cone shape and the self-emptying tipping spoon are designed to provide very accurate rain data, especially in high wind conditions.

Can also be used as a stand-alone custom rain station using an Sensor Transmitter Kit (DI-6332), sold separately, or an EnviroMonitor Node (DI-6810).

Compatible with Vantage Connect, Weather Envoy, and Vantage Pro2 stations and Integrated Sensor Suites.
