

# Bresser Topaz 7x50 Marine Binoculars with Compass (Waterproof & Shockproof)

## Product Images

## Description

---

The BRESSER Topas 7x50 is a classic marine binocular with porro prisms. The 7x magnification is the proven standard with this application. By using optical BAK-4 glass and a multi-layer coating, these binoculars always provide a bright, high contrast image.

In addition, the Topas has an integrated illuminated magnetic compass and a reticle for determining sizes or distances with help of the ring scale on the objective barrel.

With their ergonomic rubber armouring, the binoculars are easy to grip and are also protected against shocks. With the individual eyepiece focus, once set, you can see a sharp image for all relevant nautical distances.

The lens caps are secured to the straps to prevent loss. The case will float should they be dropped overboard.

## Key Features

- Porro binoculars
- Illuminated compass
- Reticle for distance measurement
- Waterproof
- Foldable eyecups allow spectacle wearers to use the entire field of view
- Multi-coated BaK-4 glass
- Rubber armouring
- Tripod mount is included.
