

Bresser Round Digital Alarm Clock with Indoor Temperature

Product Images

Short Description

Alarm clock in an attractive mirror look with time and temperature display. The LED lighting can be dimmed in 3 stages or switched off completely during mains power operation - ideal for light-sensitive sleepers. It also has a night mode which if activated, automatically reduces the brightness from 6:00 p.m. to 6:00 a.m.

Can be operated via the mains or batteries (not included).

Description

Alarm clock in an attractive mirror look with time and temperature display. The LED lighting can be dimmed in 3 stages or switched off completely during mains power operation - ideal for light-sensitive sleepers. It also has a night mode which if activated, automatically reduces the brightness from 6:00 p.m. to 6:00 a.m.

Can be operated via the mains or batteries (not included).

In battery operation the display only lights up at the push of a button and switches off automatically after 10 seconds. While the alarm clock is connected to the mains, the display lights up continuously.

- Mains power or battery operated
- 12 or 24 hour time
- Indoor temperature in °C or °F
- Switch between time and temperature display either manually, or automatically
- Optional night mode for reduced brightness between 6 p.m. and 6 a.m. (can be deactivated)
- Mirror optics plastic housing
- LED-illuminated digits shine through the mirror surface
- Dimmable LED display.
