

TFA View Wireless Weather Forecaster

Product Images

Short Description

Weather prediction could not be easier with this simple yet stylish weather forecaster. The base station is manufactured in a sleek black surround with silver trim, which houses an easy to read display.

The 'View' features relative pressure display and has a 12/24 hour ahead weather forecast function, which is generated with the use of 5 different weather icons - this will indicate if conditions are due to get worse, improve or remain much the same.

You can monitor a total of 4 locations with the 'View', the station is supplied with 3 remote temperature and humidity sensors. These can be situated up to 60m (open field) away from the internal base station, and will transmit its readings back constantly. We advise that the transmitters are best placed on a North facing wall, ideally shaded. Covering the unit in any way or placing in direct sunlight can affect the readings, so we would strongly advise against this.

Description

Temperature

- Measure units : °C or °F
- Indoor range : from - 10 °C to + 60 °C
- Outdoor range : from - 40 °C to + 60 °C
- Resolution : 0.1 °C
- Recording of Min / Max
- Tendency Indicator

Humidity

- Measure unit : % RH
- Swiss high definition sensor
- Indoor range : from 20 % to 95 %
- Outdoor range: 1% to 99 %
- Resolution : +/- 1 %
- Recording of Min / Max
- Tendency Indicator

Weather Forecast

- Barometer with graphic icon display
- Relative pressure display in hPa/ inHg

Time

- Radio controlled clock updated from the atomic clock, accurate to 1 second every million years.
- Manual setting function
- Time zone : +/- 12 hours
- Display 12 / 24 hours
- Alarm with snooze
- Calendar with date / month or day / date display

Dimensions

- Base station: L 131 x W 26 x H 102 mm
- Outdoor sensor: L 45 x W 20 xH 108 mm

Battery

- Base station: 2 x AAA batteries (Not Included)
- Outdoor sensor: 2 x AAA batteries (Not Included)

Delivered With

- 1 x Base station
- 3 x Outdoor sensor (30-3194)
- 1 x User manual

Other Information

- Data transmitted at 433 MHz
- Transmission distance : 60 metres (open field)

Additional Information

Brand	TFA Dostmann
Contents	TFA VIEW 35.1142.01 Display Console 3 x Wireless Temperature & Humidity Sensors Instruction Manual
Explanation	<p>Controlling indoor temperature and humidity with targeted heating and ventilation creates a comfortable and healthy living environment and even saves on heating costs. Ideal indoor temperature ranges between 18 °C and 22 °C and relative humidity of between 40 and 60%.</p> <p>The device stores the max and min values for all measured values. Trend arrows show the current trend.</p> <p>Temperature:</p> <ul style="list-style-type: none">— Indoor temperature measurement ranges: -10°C to 60°C— Outdoor temperature measurement ranges: -40°C to 60°C <p>Humidity:</p> <p>Indoor measurable range: 20 to 95%rH Outdoor measurable range: 1 to 99%rH</p> <p>Remote Sensors:</p> <ul style="list-style-type: none">— 433.92MHz RF transmitting frequency— 60 metre transmission range in open area— 3 channels selectable
Ideal For	Amateur, Interested, Gardeners
Finish	Black
Dimensions	Console: 131 x 26 (63) x 102 (100)mm
Power	Console: battery only (2 x AAA, not included)
Sensors	3 x Wireless Temperature Sensor is included. These can be placed outdoors or in other rooms - for example childrens' bedrooms.
Dimensions	Wireless Sensors: 40 x 20 x 108mm
Power	Wireless Sensors: battery only (2 x AAA, not included)
