

Explore Scientific WSH4008 Weather Forecast Station & Barometer with High/Low Temperature Alerts

Product Images

Short Description

The Explore Scientific WSH4008 Weather Station provides a wealth of information to plan your day in one ultra-slim LCD colour display that will look great in any room of the house.

In its upper left corner, the display unit shows forecast conditions for the next 12 hours via its six different icons — sunny, partly cloudy, cloudy, rainy, stormy, snowy. This graphic representation makes it easy to assess what the weather may hold with just a glance.

Description

Key Features

- Indoor and outdoor temperature
- Indoor and outdoor humidity
- Weather forecast from 6 icons, based on the barometric pressure
- Barometric (air) pressure with trend for next 60 minutes
- Moon phase
- Radio controlled time and date from DCF signal with +/-12hr time zone offset
- Manual setting option for clock
- 12/24h time display
- Date and weekday display
- Two alarms with snooze function
- High/Low indoor & outdoor temperature alerts
- LCD colour display with two brightness levels
- Table standing
- Low battery indicator
- Power supply included
- Incl. 1 x wireless temperature and humidity sensor. Add up to two more (e.g. to monitor children's bedrooms).

Additional Information

Brand	Explore Scientific
Contents	1 x Explore Scientific WSH4008C display console 1 x UK mains power adapter 1 x wireless temperature and humidity sensor
Explanation	<p>In its upper left corner, the display unit shows forecasted conditions for the next 12 hours using its six different icons — sunny, partly cloudy, cloudy, rainy, stormy, snowy. This graphic representation makes it easy to assess what the weather may hold with just a glance.</p> <p>Along the right side of the indoor display, users can view current temperature and humidity readings for both inside and outside. The external measurements are courtesy of the included remote sensor that mounts outside to gather outdoor temperature and humidity readings and transmit the data to the indoor display from a range of up to 30 metres.</p> <p>The weather station houses a digital barometer that allows it to show current air pressure as well as predicted trends for the next 60 minutes using arrows to indicate rising, stable and falling air pressure. This trend indicator is located next to the barometer reading in the lower left corner of the display. Users can also set high/low alert alarms for both outdoor and indoor temperatures. These selections appear on the right side of the indoor unit.</p> <p>The lower left corner of the display shows time and date information as well as the current moon phase. The time can be set manually or through radio signal for guaranteed precision. The unit has a double alarm feature, which is convenient for different weekday and weekend settings, and a snooze button. Icons in the time section of the display unit indicate which, if any, alarms are active.</p> <p>The indoor unit includes both a wall mount fixture and a fold-out stand for multiple display options.</p>
Ideal For	Amateur, Interested, Gardeners
Finish	Silver and Black
Power	Display Console: mains power, with optional battery backup (3x AAA batteries (not included))
Sensors	1 x outdoor temperature and humidity sensor is included (range up to 30 metres). You can add up to two more sensors. These can be placed outdoors or in other rooms - for example childrens' bedrooms.
Power	Wireless Sensor: 2 x AAA batteries (not included)

Additional Options

Batteries

5 x AAA Alkaline 1.5V Batteries
