

TFA Analogue Rain Gauge 47.1000

Product Images

Short Description

High quality frost resistant clear plastic rain or sprinkler gauge.

Highlights

- Made in Germany
- Determines the rainfall easily and accurately
- Ideal for the garden or for agriculture
- Weatherproof and robust.

Description

A practical rain gauge for easy and accurate determination of rainfall amounts, made of high-grade and stable plastic with integrated holder.

In order for the result to be as accurate as possible, the rain gauge should be placed on a suitable rod at a height of about one meter above ground. It should stand upright and free from obstructions such as buildings or trees. An ideal helper for the garden and agriculture and for those who want to know more about nature.

This product is entirely manufactured in Germany.
