

Universal Crank-shaped Mounting Pole Kit

Product Images

Short Description

High quality crank-shaped alloy pole and bracket for mounting weather stations' integrated outdoor sensor suites. Useful where you wish to mount the pole to a wall or fascia and need to clear the eave of your roof.

Suitable for ACCUR8, Davis, Bresser, Explore Scientific, Technoline etc.

Description

The kit comprises a quality metal alloy 3ft long pole (cranked).

The bracket is also quality metal alloy, with a U-bolt that can be tightened to provide a superior grip on the pole/mast.

Suitable for fixing directly into wood, or masonry. Note: Fixings are not included for attaching to a wall or fascia (they should be selected depending on what you plan to fix it to).

Additional Information

Brand	ACCUR8
