

# TFA Monsun 47.3003 Wireless Rain Gauge with Outdoor Temperature, plus Alerts for Rain & Temperature

## Product Images

## Short Description

An excellent rain gauge with programmable alarms for both rain and temperature allowing you to be warned against rain fall and a per-determined temperature. Ideal if you need to be warned about the current outdoor or indoor temperature.

Classed as a self emptying rain gauge the unit is actually a funnel that monitors the rain fall going through it, which simply empties onto the grass.

## Description

---

Rain gauge with wireless transmission sensor of rainfall and outdoor temperature (up to 30 m).

Graph and historical values of the last 7 days, Weeks and months.

Unit comes with programable alarm for both temperature and rainfall.

Display of indoor temperature, max.-min function
