TFA 47.3006.01 Wireless Rain Gauge with Indoor/Outdoor Temperature & Rain Alert

Product Images

Short Description

Introducing this digital wireless rain gauge. With innovative features, this unit precisely measures the extent of rainfall, plus indoor & outdoor temperatures. Key features include a monthly rainfall history tracker for the last 12 months, a 24-hour rainfall alarm for real-time precipitation updates, and a radio-controlled clock that displays both the weekday and date.

Description

Product information

Rainfall Measurement: The rain gauge is designed to quantify rainfall effortlessly, providing you with detailed insights into precipitation data.

Wireless Outdoor Temperature Tracking: In addition to measuring rainfall, the unit also displays outdoor temperature wirelessly.

Rainfall History: Gain a deeper understanding of the climate trends with this device's ability to record current rainfall, the last hour, the last 24 hours, the entire day, the last 7 days, the current month, the current year and total, enabling long-term tracking of your area's precipitation patterns.

24-Hour Rainfall Alarm: Stay ahead of weather changes by setting a 24-hour rainfall alarm which will alert you in real-time whenever rainfall exceeds the threshold established by you.

Radio-Controlled Clock with Weekday and Date: This sophisticated rain gauge does more than just monitor the weather – it also features a radio-controlled clock display that showcases both the weekday and date, adding convenience and functionality to your rain station.

Features at a glance

- Wireless transmission of outdoor temperature and rainfall amount (max. 60m)
- Indication and graphical presentation of the current rainfall, the last hour, the last 24 hours, the entire day, the last 7 days, the current month, the current year and total

- Animated rain symbol (when it is raining)
- Outdoor and indoor temperature with temperature tendency arrows, and max.-min.-function
- Radio-controlled clock with weekday (7 languages) and date.
- Two alarm times
- Adjustable alarm frequency (daily, weekday, weekend)
- Snooze function with adjustable interval
- Backlight

Specification at a glance

In the box	Base station, rain and temperature transmitter, instruction manual
Measuring range rainfall amount	0...9999 mm (0...393.6 inch)
Measuring range temperature indoor	0...+50°C (32...+122°F)
Measuring range temperature outdoor	-40...+ 70°C (-40... +158°F)
Maximum wireless range	60 metres
Transmitter included in delivery	30.3252.01 (T+R-transmitter)

Clock	Radio-controlled clock
Transmission frequency	433 MHz
Material	Plastic
Assembling	Freestanding
Power	Batteries
Batteries	4 x AA 1.5V
Batteries included	no
Dimensions	(L) 150 x (B) 44 x (H) 96 mm
Weight	173 g

Additional Information

Brand	TFA Dostmann
Type	Digital
Temperature Sensor	yes
Rain Sensor	yes
Rain Alarm	yes
Power	Battery
Calendar	yes
Indoor Temperature	yes
Outdoor Temperature	yes
Explanation	<p>Note regarding radio-controlled time: The time is transmitted from the DCF-77 automatic clock near Frankfurt, with a range of about 900 miles. Your radio-controlled clock receives the signal in order to show the exact correct time. During setup, you can select the time zone correction for the UK.</p> <p>The adjustment of British Summer Time (BST) and Greenwich Mean Time (GMT) is automatic.</p>
Ideal For	Amateur, Interested, Gardeners
Indoor Temperature Range	0 ... +37°C (+32 ... +99 °F)
Outdoor Temperature Range	-40...+ 70°C (-40... +158°F)
