

DISCONTINUED - Oregon Scientific RAR502X Multi-Zone - Measure Temperature & Humidity in 4 Locations

Product Images

Short Description

Weather forecast station which monitors temperature and humidity in up to four locations around and outside your house.

Description

Keep your family comfy indoors and out with this sleek device that monitors temperature and humidity in up to four locations around and outside your house. The living room, the baby's room, the garden - put a remote sensor anywhere!

With easy-to-read weather icons on a large LCD display to indicate the forecasted weather up to a day in advance, including mould alerts, you can always be prepared for the weather.
