

Davis Wireless Temperature Station

Product Images

Short Description

Wireless temperature station. Includes stainless steel temperature probe with 3.6m cable.

Description

A Davis Vantage Pro2 additional temperature station can be one of up to 7 additional stations on a Vantage Pro2.

The stainless steel temperature probe can be used in air or any relatively inert medium such as water.

Additional Information

| | |
|--------------|---|
| Brand | Davis Instruments |
| Explanation | Battery powered with a 3.6m cable for the temperature sensor so the transmitter can be located out of harms way. If the temperature sensor is for air temperature then consideration should be given to screening it from solar or reflected radiation. The data is viewed on a Davis Vantage Pro2 Console or Envoy or Envoy8X and within WeatherLink. |
| Contents | Includes stainless steel temperature probe, transmitter inside weather-resistant shelter, and mounting hardware. |
| Batteries | 1 x LR123 Lithium battery required (not included). Lasts up to one year under normal conditions. |
| Power | Battery Only |
